

'Delicate Paper Lace'

A textile workshop with Jill Flower

An experimental day with Jill - discover a technique producing a wispy fabric, working with water soluble products, paper and stitch.

Inspired by the formal patterns of lace, a wispy material is formed. The techniques can be used with in a number of projects requiring a delicate and dainty finish, such as brooches and fascinators.

A sewing machine is required and some knowledge of 'Free-machining' is preferred.

A small requirement list will be issued.
