

# 'From Art to Stitch'

A textile workshop with Jill Flower

This is a fun and exciting day - full of surprises. It will give you a new refreshing way of creating a design and relating it to a textile.

The experimental art day consists of completing a small sketch book using a variety of mediums - from crayons to acrylics and inks to oils.

Free form layers of marks and patterns are built up to create your sketch book. Once completed a page is chosen and, using fabrics and threads, the design is replicated using either hand or sewing machine, to produce a unique textile.

These art techniques can also relate to a student's ongoing project.

A small requirements list will be issued.
